NEXEDGE™

Autotel

Digital Race Radio

Complete 2 car 10 pit Radio Team system

Clearer Speech.

Consistent Digital voice quality and volume.

Secure Communications.

Digital encryption prevents eaves dropping.

Less interference from other users.

Other teams no longer bleed over your radio system.

Better noise cancelling.

Engine and car noise is almost eradicated.

Full Digital, Full Analogue or mixed Analogue & digital modes.

The best mode can be selected for every application.

Increased Range

The use of a repeater is not always necessary to give full track coverage.

NX9000 radio unit for battery operation

NX9200 radio unit for 12 volt operation

Team Comments

"Like night and day compared with our old Analogue system"

"It's like having the engineer sitting on my shoulder" Driver comment

"Amazing! Covers Silverstone GP circuit without a repeater"

**Autotel Digital is now being used in major Race series
GP2, Blancpain, ELMS, BTCC, WSR, Asian Le mans, WTCC**
